Summary

A Russian manufacturer of products and equipment from polymer sheet materials for aggressive chemical environments is looking for partners abroad interested in cooperation in the framework of distribution services agreement.

Advantages and Innovations

All products are certified according to ISO 9001: 2011 and have Declarations of Conformity, Certificates of Conformity and own Technical specification TU 2291-001-95801889-2015.

The high quality and appearance of products are approved by the certificates and feedbacks of clients available on the web site.

Permanent qualified staff has big working experience.

The company has its own industrial site located on the territory of 1.1 ha that allows to produce big volumes of products in short time.

Modern equipment and machinery allow to decrease costs and improve quality of produced items.

The company works with materials supplied directly from the Russian and foreign producers, including German ones.

Development department of the company is able to design products at individual requirements of a client.

The company has experience in export sales.

Description

The Russian company from Sverdlovsk region since 2006 has been specializing in design, development, engineering, production, delivery and installation of equipment from polymer sheet materials for aggressive chemical environments.

The company produces:

Parts of ventilation systems (air pipes, branch outlets, valves, sound attenuators, cowls) of the diameter from 50 mm to 2400 mm;

Radial fans from 370 m³/h to 80 000 m³/h with pressure from 450 Pa to 8 000 Pa;

Roof fans from 4000 m³/h to 50 000 m³/h;

Scrubbers, gas washes (horizontal and vertical) from 1100 m³/h to 100000 m³/h;

Galvanic bathes, baskets, inserts;

Laboratory furniture from polypropylene (fume hoods, acid stands);

Vessels, tanks, bins, reactors, nutsch filters;

Manufacturing of non-standard items from polymers.

The company has experience in international cooperation with partners from China, Germany and also in export deliveries to several countries.

The company is looking for partners from metallurgy, machine building, and chemical industry.

Under the distribution service agreement the company is looking for partners interested in reselling products of the company to chemical manufactures, non-ferrous metallurgy plants, machine-builders that have galvanic production units, chemical laboratories, refining, by-product recovery department.

Potential partners may also be interested in reselling gas washers and fans from polypropylene or polyvinyl chloride to series producers of galvanic lines; and to supply company's products to trade, installation and engineering companies that work in the sphere of industrial ventilation and scrubbing.

The company is also interested in establishment of technical cooperation with research and development and design institutes specializing in design and selection of equipment for indicated types of productions.

The expected result for the Russian company is export expansion and profit-making; for foreign partner – commercial rewards for selling of products.
